†Circulare begin with No. 13 following the Press Bulletin series. Through an oversight, numbering started with 13 instead of 14. Circular No. 1, "Directions for Selecting Seed, Planting, Cultivating and Caring for the Potato Crop," by T. S. Parsons, was published in 1913. The numbering of this circular seems to bear no relationship to either the Press Bulletin or Circular series above.
‡Published as Experiment Station Bulletin No. 148.
