**University of Wyoming – National Park Service
Harlow Summer Seminars at the AMK Ranch**

THURSDAY, JULY 17TH, 5:30pm

**“Wyoming’s Ungulate Migrations:
*Ecology and Conservation amid Changing
Landscapes*”**

**Dr. Matthew Kauffman
Wyoming Migration Initiative
University of Wyoming**

Ungulate migrations are in widespread decline across the globe. This talk will synthesize studies conducted by Dr. Matthew Kauffman’s research group at the University of Wyoming, which are helping researchers better understand why and how ungulates migrate. It will also explore how migratory populations are being altered by a variety of factors, including drought and energy development, among others (for more information go to <http://migrationinitiative.org/>).

We will have a barbecue at 5:30 with hamburgers, veggie burgers, hot dogs, chips, salads and dessert for a \$5 donation. The talk starts at 6:30 in the historic Berol Lodge at the AMK Ranch. Turn right in the Leek’s Marina parking lot in Grand Teton National Park. Reservations not required.
