THURSDAY, JUNE 25th 2015, 5:30pm

***“Fisheries Management in the West:
Case Studies on Jackson Lake and the Hoback River”***

**Diana Miller, Fisheries Biologist
Wyoming Game and Fish Department
Jackson, Wyoming**

Fisheries management in the United States has changed dramatically through time. These changes are reflected in the places and fish that we love. How we got where we are today plays a large role in how we move forward into the future. This talk will give a brief background on the history of fisheries management in the US and will highlight how changes in fisheries management trends across the west influence our local fisheries, specifically Jackson Lake and the Hoback River. I will also discuss how fisheries are surveyed and how management decisions are made based on the results of those surveys.

Barbecue at 5:30 with hamburgers, veggie burgers, hot dogs, chips, salads and dessert for a \$5 donation. The talk starts at 6:30 in the historic Berol Lodge at the AMK Ranch. Turn right when entering Leek's Marina parking lot in Grand Teton National Park. Reservations not required.
